About Microsoft Dynamics

Microsoft Dynamics is a line of integrated, adaptable business management solutions that automate and streamline financial, customer relationship, and supply chain processes in a way that helps you drive business success.

For more information about Microsoft Dynamics, visit www.microsoft.com/dynamics.

OPPORTUNITY

Business Ready Licensing in two editions for Microsoft Dynamics™ NAV 5.0

Choose an edition based on the level of functionality you need.

BUSINESS READY LICENSING FOR MICROSOFT DYNAMICS NAV EXISTING CUSTOMERS

Microsoft recently announced the policy for existing customers who want to transition to Business Ready Licensing. This new policy offers customers the opportunity to significantly extend the capabilities of their solution at a potentially reduced cost. Customers may find value in transitioning to Business Ready Licensing for one of two reasons:

1. You can extend your solution.

Business Ready Licensing editions deliver more capabilities at an attractive price so you can automate new areas of your business to help increase efficiency and drive down costs.

2. You can expand your Microsoft Dynamics NAV footprint.

Customers who are currently constrained by the 10-user limit on the Microsoft Dynamics NAV Standard Edition may transition to unlimited users in Business Ready Licensing to increase scale and flexibility for a limited cost.

If you are an existing Microsoft Dynamics NAV customer, contact your Microsoft partner to find out if transitioning to Business Ready Licensing is right for you.

BUSINESS ESSENTIALS Edition provides core financial management and trade functionality, including:

- Basic financial management (general ledger, payables, receivables, fixed assets).
- Basic supply chain management (sales order processing, purchase order processing, inventory).
- Basic business intelligence and reporting.
- Basic configuration and design tools.

ADVANCED MANAGEMENT Edition offers advanced financial and accounting programs that support expanding business needs and includes:

- All functionality in the Business Essentials Edition.
- Advanced business intelligence and reporting.
- Manufacturing.
- Advanced supply chain management (bill of materials, requisition management).
- Advanced financial management (collection, cash management).
- Project management.
- Sales and marketing.

You can also choose **ADDITIONAL COMPONENTS** (a la carte granules) when you need a richer set of features and functionality to support your unique business needs. Different a la carte components are available for Business Essentials Edition and Advanced Management Edition.

The components included in each edition are listed inside. Functionality may vary by region and country.

BUSINESS READY LICENSING GUIDE
Key:

BE Business Essentials **BE+** Additional components for Business Essentials
AM Advanced Management **AM+** Additional Components for Advanced Management
